**Forecast for Monday 27 May 2024**

**Weather:** A similar day as to Sunday and whilst still breezy, it will be somewhat less windy with fewer showers and longer drier spells. Isolated heavy showers are still possible, mainly late morning and early afternoon. Becoming mostly dry from the middle of the afternoon and staying dry into the early evening. Turning cloudier after dusk with a chance of drizzle on southern upslopes around midnight.

**Chance of cloud-free hill tops above 600m:** 60% at first, increasing to 90% by mid-morning. Falling to 40% around midnight.

**Low cloud and visibility:** Patches above 600-700m, generally lifting above all the summits by mid-morning, outside of any showers. Extensive cloud base 400-600m reaching the south of the Park around midnight. Often very good visibility in between showers with excellent air clarity but temporarily moderate during the heavier showers and late evening drizzle. Locally very poor in any hill fog.
